VENTILATION!

Have movement of air across work area & away from you. This draws any smells or fumes away before they go up your nose. Work outside in a light breeze, an open garage, or by having a box fan in an open window that's located on opposite side of table you're working on: point it outside so it sucks room air to the outside. Ideally, have a window open somewhere else opposite so fresh air comes in to replace the air the fan is pushing outside. This is almost as good as an "exhaust fan" that is built into an art studio.

SAFETY INFORMATION

In general, follow these precautions:

- Wear an approved dust mask when handling powders so you don't inhale dye or chemical dust.
- Wear protective goggles or safety glasses to keep dyes & chemicals out of your eyes.
- Wear rubber gloves so that you don't wreck your skin or bring colored hands to your day job.
- Have adequate ventilation if fumes or dust are present. Use cross ventilation or an exhaust fan.
- Don't breathe fumes. Dust masks don't help with fumes, only ventilation or deluxe respirators.
- Don't use cooking or eating utensils. Keep surfaces clean, use good housekeeping procedures.
- If you're going to store anything in the fridge, tape the container closed & label it clearly.
- Keep the dyes away from unsupervised little children. The colors look like food to them.
- Keep dyes & chemicals away and out of reach of unsupervised children & pets, period.
- Pregnant women must be particularly alert. Discuss the use of any chemical with your doctor.
- If you experience an adverse reaction from using any product, stop using it at once.
- Use your common sense & pay attention to what you are doing. Don't work when you're tired.

HOT FIX ANGELINA!

Wow! Now available in Straight, Crimped or Metallic! Fantastically fun, shimmery or sparkly, all "Hot-Fix" Angelina is heat bondable - bonds when heat & pressure are applied. Place it between 2 sheets of paper towels or pressing sheets, use silk setting on your iron for 3 seconds & it becomes a shiny sheet of polyester fabric that can be stamped, stitched, glued, bonded, or embellished! Machine washable! Very soft. Add bits to your regular roving to give some pizzazz when spinning or felting! To adhere Angelina to fabric, use our Bo-Nash Bondable Agent. Watch video on our website. Weave into other fibers or yarns to make beautiful glittery customized yarns for knitting. Add texture, depth & color to any mixed media or scrapbooking project. Try it for making fishing flies - it makes great nymphs! Made in the USA! Single color packages contain 1/2 ounce of fiber. Sampler packs have 1/10th ounce of six colors. Jelly Beans have 1/10th ounce of 14 colors. Angelina Fibers come in a straight cut & now the NEW METALLIC (also straight cut) & the NEW CRIMPED CUT. The Metallic Angelina Fibers are much richer colors & are a little shinier than the regular straight cut. The Crimped Angelina has a jagged edge which gives it more texture than the straight cut. And, it feels more like fabric when it is bonded.

INTRODUCTORY INFO TO ALL DHARMA FABRICS BY THE YARD

Thread count & oz./sq yd are based on the best info we have. 10 oz./sq yd means a square yard (36" wide by 36" long) weighs 10 ounces. Width measurements may vary slightly. Bolt yardage on fabrics does vary. We will charge for what is actually on the bolt shipped to you. Regretably, returns of fabric invoke a 20% restocking charge. We can only cut & sell full yards - we cannot cut fractions of a yard or half yards. Fabrics are NOT pre-shrunk. Shrink before cutting patterns!

MOST OF OUR FABRICS ARE WHITE, PFD WHITE, UNBLEACHED, OR BLACK (AS NOTED WHEN BLACK IS AVAILABLE).

WE ARE NOW OFFERING SILKS IN AN ARRAY OF COLORS ON PG. 69

WE'LL MAIL YOU A SAMPLE OF ANY OF OUR FABRICS FOR 25 CENTS! NO POSTAGE! WHAT A DEAL!

YOUR LOCAL FABRIC STORE VS. DHARMA FABRICS: ABOUT FABRICS INTENDED FOR DYEING!

Fabric you use for dyeing or painting is very important to the outcome of your project. If it's been treated in any way (for crease resistance, permanent press finish, water proofing finish, preservatives, anti-mold finish, etc.) these will resist dye entirely or reduce effectiveness of any dye adhering to the fiber molecule. All the fabrics we carry are intended to be without such treatments & unless otherwise noted, are ready to dye as is. Prewashing is ALWAYS suggested to remove soil, hand oils, & other dye resistant oils from production, for even dyeing, and to pre-shrink fabric before cutting out your pattern pieces!

Thread count & oz./sq yd are based on the best info we have. 10 oz./sq yd means a square yard (36" wide by 36" long) weighs 10 ounces. Width measurements may vary by shipment. Bolt yardage on fabrics does vary. We will charge for what is actually on the bolt shipped to you. Regretably, returns of fabric invoke a 20% restocking charge. We can only cut & sell full yards - we cannot cut fractions of a yard or half yards.

MACHINE HEMMED SILK SCARVES

The days of hand rolled scarf hems are numbered. The number of workers that have the skill & willingness to hand hem thousands of scarves is decreasing (they're getting older & young folks in China don't want to do it). These days scarves can be hemmed faster & cleaner with machines. Here are our most popular styles, in the most popular sizes.

All silk scarves are not created equal. We can find less expensive scarves but there are just too many problems with them. We offer only the best quality available & have no problems & happy customers. All of our scarves are #1 quality "firsts"-grown, woven & sewn in mainland China. The hems on all 4 sides are hand rolled & sewn with 100% silk thread (unless they are the new machine hemmed ones). Although the silks are untreated & are ostensibly "ready-to-dye", we have found that with silk in general, occasionally small amounts of silk gum - Sericin, (the stuff left by the moths) is still in the fabric. Where there is gum, finger prints or other oils, the fabric will dye lighter. Look for shiny areas in your silk - we recommend pre-washing all silk if you want to be really safe, in HOT water and Synthrapol or our new Professional Textile Detergent. Also, Milsoft, the industrial fabric softener we sell is highly recommended for returning the soft "hand" to your silk after dyeing or painting.

SEE OUR WEBSITE FOR LOTS OF EXTRA INFO & TUTORIALS ON PAINTING, DYEING, & STEAMING SILK. WE ALSO HAVE LOTS OF COLOR PHOTOS OF SILK SCARF PROJECTS & PHOTOS OF FINISHED SCARVES MADE BY FEATURED ARTISTS!

It's natural for silk to have irregularities. It's the nature of silk fabric. They are expected and not considered defects.

SILK CUT VELVET SCARVES WITH 4" RAYON FRINGE

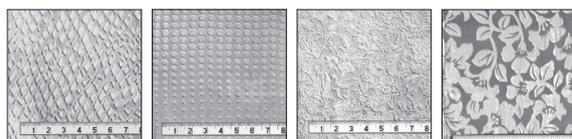

They're all the rage now! You can see them in high end stores for \$60-\$90. For us it's just another beautiful scarf & we can sell them as inexpensively as all our scarves. Silk cut velvet has a rayon pile on a silk background. It's 18% silk & 82% rayon. The rayon pile is in patterns & there is a rayon fringe on some of the styles. The big thing here is that just dyeing them a solid color with either silk or cotton dyes, yields a fabulous result. The rayon & silk dye in different shades on the same scarf - fun!

BEST WITH TIES.**

Beautifully made in China & sewn with 100% silk thread. Made extra long with a synthetic insert which is an advantage for painting. Better to dryclean rather than wash silk ties, so they don't lose their shape. For this reason, artists often choose to work on these with paints, like Dy-na-flow or Setasilk instead of dyes. Paint, dry, iron, & you're done! If you choose to use dyes, it must be HAND washed. Then blot carefully until totally dry. Never machine wash or machine dry!

SILK DO-DADS FOR PAINTING & DYEING

A REALLY GREAT IDEA!

SILK FOLDING SUN HATS!

Take it out of it's pouch & "Pop", it springs open into a 24.5" sun hat. Then with a simple twist it becomes a 6 inch disk that goes back into a matching pouch. The bag & hat are 8mm Silk Habotai & can be dyed or painted. Careful, though, as the inside rim is metal & will rust if wet for too long. Use silk paints like Dy-na-flow or Setasilk & heatset. Or use a dye like Jaquard or Tinfax painted on rather than submersing. Made in China. White only. Imagine the possibilities! For promotions, vacations, keep one in your purse, leave one in the car! Give-a-ways at weddings! Sell them at outdoor concerts, sports events, beaches, wherever there's sun!

HABOTAI SILK GOOD LUCK BANNERS

Here's the Silk version of our Good Luck Banners that we've been asked for. 8mm Habotai and ready to paint. We made these shorter - about 6 foot with a 2.5 foot tail for indoor use. For extended outdoor use it might be better to use the nylon or cotton which come in short and tall. They have a slot sewn along the edge to receive a pole. They make colorful accents on booths, in hallways and entries. Many uses when decorating a home or business.

"mm" stands for "momme", NOT millimeters, a Japanese unit of measure for the weight of silk that is also used in China. It sounds like "mummy". One momme = 3.75g of a 25 yd X 1.49 inch strip of silk, or 3.62 grams per sq. yd. The higher the mm, the heavier the silk. Ethereal see-through Gauze is about 3mm, heavy Charmeuse is 19.5mm, average Habotai (China Silk) is 8 or 10mm. Just in case you were wondering!

It is important to wash all silk before dyeing if you want to be really safe! We recommend Synthrapol

or our Dharma Prof. Textile Detergent (pg. 13). A capful of one of these in a sinkfull of HOT water or a 1/4 cup to a standard washing machine. Keep in mind, all silk is better off hand washed & air dried - reduces shrinkage and abrasion. Although our silks are untreated & are "ready-to-dye", we find that with silk in general, occasionally small amounts of silk gum (the stuff left by the moths) is still in the fabric. Where there is gum, the fabric will dye lighter. Finger prints & oils from the factory or just handling can cause splotchy dyeing as well. Once silk is dyed, wash in cool water.

It's natural for silk to have irregularities. It's the nature of silk fabric. They are expected and not considered defects.
