

* IMPORTANT *

WARNING! -- Please do not drink or splash in eyes or soak your hands in this solution. If you have sensitive skin please use rubber gloves when saturating fabric. Also avoid direct inhalation when using product, proper ventilation is recommended.

PROPER USE OF THE PRODUCT

It is very important to follow the directions on the label of the bottle. If you attempt any other methods or use of the product you may receive inadequate results.

Bubble Jet Set has a Chemical Fiber Reaction, which attracts the ink pigments, which allow the image to become permanent. As a result, it is very important to cover or keep the top on the product when it is not being used. The oxygen in the air can weaken the product and it will begin to lose its strength. The product can lose strength through continuous use and exposure to the air once the bottle is open.

Also, the product must be shaken well before every use. The chemical will separate from the water, which will appear blue on the bottom and white on the top. To achieve minimum color loss shake well before every use.

Drying methods --- simply hang dry the fabric after saturation (do not squeeze liquid out of the fabric)

It is very important to know that this product may have different results with different printers and Inks.
