I. PRODUCT IDENTIFICATION

Trade Name: Glitz Adhesive
Manufacturer: Jones Tones Inc.
33865 United Ave.
Pueblo, CO 81001

Phone Numbers: 888-948-0048
719-948-0048 Ex: 8
Fax: 719-948-2008

Chemical Family: Styrene Acrylic Polymer in water
DOT Shipping Name: Styrene Acrylic Polymer in water
DOT Status: Not regulated

Date: 3/1/2013

II. OSHA REGULATED INGREDIENTS

Ingredients are judged non-hazardous are regarded as trade secrets.

NOTE: See section XII for other regulatory information

Carcinogen status: NTP – NO  IARC – NO  OSHA – NO

* SARA 313: No toxic chemical(s) subject to the reporting requirements of section 313 of Title III and of 40 CFR 372 are present.

III. PRECAUTIONARY INFORMATION

- Product is not considered hazardous under normal conditions.
- Direct contact of product with eyes can cause irritation.
- Prolonged or repeated contact with skin may cause irritation.

IV. EMERGENCY and FIRST AID PROCEDURES

Eyes: Flush immediately with water for 15 minutes. Consult a physician if irritation persists.

Skin: Wash affected area with soap and water.

Inhaled: Remove subject to fresh air.

Fire: Product is non-flammable in the liquid state. Use water spray, foam, dry chemical or carbon dioxide on dried product.

Spill: Collect and remove using inert absorbent. Contain spill entering sewers. Notify appropriate agencies.
Existing Health Conditions Affected by Exposure - No known effects on other illnesses

No mutagenic effects. The product does not contain regulated levels of NTP, IARC or OSHA listed carcinogens.

Inhalation: No reported effects. Exposure of the product to the eyes may cause irritation.

Skin: Exposure to the product may cause dryness and irritation.

Eyes: Exposure to the product may cause irritation.

IX. EFFECT OF OVEREXPOSURE

Hazardous decomposition products: Carbon dioxide, carbon monoxide, and water. The product can yield low molecular weight hydronications such as carbon monoxide and water. Exposure to the product can cause respiratory irritation and may cause coughing and shortness of breath.

IX. REACTIVITY INFORMATION

UN and Hazchem Code: UN1996

IX. FIRE PROTECTION

Standard industrial ventilation is recommended.

Respiratory protection is not normally required. Use NIOSH/MSHA-approved respiratory protection if conditions warrant.

FOR FIRE FIGHTERS

Leakage may emit toxic fumes. Use appropriate self-contained breathing apparatus.

IX. PROTECTIVE EQUIPMENT

Personal protective equipment is recommended to protect the respiratory system. Eye protection should be available.

V. PHYSICAL DATA

Solubility in Water: 8.67 lbs/ft³

Weight per gallon: 200 ft³

Boiling Point: Heat Self-Limited

Melting Point: Heat Self-Limited

Publication Date: 3/1/2013

Jones Lomes, Inc.

406-575-3835

MHS
Note: This information must be included on all MSDS that are copied and distributed for this material.

NA - Not applicable, NE - Not established, NSR - No special regulatory, ND - Not determined

ABBREVIATIONS

ASTM D-4236
Canadian EPA
This product conforms to the Domestic Substance List of the Canadian Environmental Agency.

Caifornia Prop. 65
This product contains one or more chemicals known to California to cause cancer and/or birth defects or other reproductive harm.

TSCA
This product contains chemicals that are listed on the TSCA inventory.

XII. REGULATORY INFORMATION

X. STORAGE

Large Spills

Small Spills

CR 26. Consult your state’s or local authorities for proper disposal of the over more restrictive requirements.

Disposal

This product does not meet the definition of hazardous waste under the U.S. EPS Hazardous Waste Regulations 40 CFR 261. Comply with your state’s or local authorities for proper disposal. Should be disposed of as specified in the appropriate regulations.

Spills

Jones Tones, Inc. 06- Gith Adhesive

As a Board Certified Toxicologist, I have been requested to review Jones Tones 406-Glitz Adhesive product for LHAMA certification according to the criteria defined in American Society for Testing and Materials (ASTM) Standard D-4236 and the US Consumer Product Safety Commission's (CPSC) Regulations 16 CFR 1500.14.

This review considered all the available data, including the relevant data from the US National Toxicology Program and the World Health Organization's International Agency for Research on Cancer and other sources of information in the U.S. National Library of Medicine's toxicological databases. This information was used to assess the need for chronic health hazard warnings including carcinogenicity, reproductive/teratogenic hazards, neurotoxicity and other potential chronic adverse health effects. Relevant information on bioavailability and exposure were also considered. In the absence of specific information, reasonable judgments were made to realistically assess the potential hazards of this product.

This product is intended for use by children eight years of age and older under the supervision of a responsible adult. Quantitative lists of the ingredients in this glue, Jones Tones 406-Glitz adhesive was submitted to the reviewer. It is assumed that these ingredients contain no contaminants at concentrations that would be toxic or corrosive. As much as 120 grams of this glue in a single consumer product may be expected to contact the skin of a consumer as frequent multiple exposure events and/or smaller amounts of glue may occasionally be ingested and/or rarely contact the eyes as a single exposure events. Residues of the semi-volatile ingredients that evaporate from this glue are assumed to be diluted at least 100-fold with fresh ambient air before they are inhaled. The ultimate assessment of potential hazards for this product is based on this formulation. Please advise if there are any alterations to this formula.

Searches of the National Library of Medicine’s toxicological databases and information from other sources provided no data to indicate that any of the other ingredients in as much as 120 grams of this glue would be expected to cause significant chronic toxicity to consumers who may be exposed as described above.

Based on all the information provided to date and if the assumptions mentioned above are correct, it is this toxicologist's opinion that this Jones Tones 406-Glitz adhesive product would not be expected to cause chronic toxicity in consumers who may be exposed as described above. Consequently, this “Jones Tones 406- Glitz Adhesive” product conforms to the requirements of ASTM D-4236 and requires no precautionary labeling in accordance with the CPSC's Regulations as mandated by the Labeling of Hazardous Art Materials Act (LHAMA). This product must bear the following statement: Conforms to ASTM D-4236.
